Class meets on Thursdays at 3:00 – 4:00PM in L1-101 (McKnight Brain Institute)

In this course, we will summarize contemporary and relevant literature in all areas of vision research. Students will be expected to present one instructor-approved manuscript per semester and to actively engage in discussions of peer presentations. Papers include topics in neuroscience, genetics, molecular biology, and biochemistry underlying vision and the diseases that affect this important human sense. S/U grade, 1 credit
