

Neuromedicine Summer Seminar Series 2014

Thursdays, 12:00 – 1:00pm

LG-110A/B, McKnight Brain Institute

Seminar Coordinators: Paramita Chakrabarty, PhD and Joseph McQuail, PhD

Date	Speaker	Seminar Title
June 12	Zin Khaing, Biomedical Engineering	Engineered Biomaterial Scaffolds for Neural Stem Cells
	Darin Falk, Pediatrics	Gene Therapy for Diseases Affecting the Neuromuscular Junction
June 19	Simon D'Alton, Neuroscience	Studies Of Alternative Isoforms Provide Insight into TDP-43 Autoregulation and Pathogenesis
	Cristina Whitehouse, Psychiatry	TBD
June 26	Luis M Colon Perez, Psychiatry	Topology of Brain Networks Using MRI and Tractography
	Tuhina Prasad, Ophthalmology	Expression and Cellular Localization of Mas Receptor in Mouse Retina and Neuroprotection by Angiotensin-(1-7)
July 10	Amber Muehlmann, Psychiatry	Pathophysiology and Pharmacology of the Indirect Basal Ganglia Pathway in Mouse Models of Repetitive Behaviors
	Yenisel Cruz-Almeida, Aging and Geriatric Research (CAM-CTRP)	Pain, Aging and the Brain: Interactions with Cognition and Physical Function
July 17	Yona Levites, Neuroscience	Immunotherapy Approaches in Neurodegenerative Diseases
	Andrew Maurer, Neuroscience	A Multi-Level Approach to Understanding Cognitive Aging
July 24*	Caitlin Orsini, Psychiatry	A Novel Approach for Dissecting Neural Circuitry Underlying Risk-Taking
	Ashok Kumar, Neuroscience	TBD
July 31	Kevin Felsenstein, Neuroscience	Transitioning from Tool Compound to Clinical Candidate: A Case Study of a GABA(B) Antagonist
	Eric Porges, Aging and Geriatric Research (CAM-CTRP)	Aging, Cognition & GABA from Magnetic Resonance Spectroscopy (MRS)

**seminar to be held in DeWeese Auditorium (LG-101A), McKnight Brain Institute*
